

Technology Requirements for Enrolled Students

Please be advised at this time Love Beauty School, Inc. uses Milady for all programs. Upon enrollment students will be issued a tablet as part of their initial kit to be used in the classroom to access the software needed to complete the program. The software is produced by Milady, includes assignments, Ebook, etc. While in class students have access to free internet.

Once students leave the phase 1 dept, or are able to take their tablets home it is important but not required to have internet. Students may use the internet at school to complete digital assignments, reading of the Ebook, etc. Because the tablets have the capability of taking photos as well, it is not a requirement to have a separate camera or smart phone.
